**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael J. Fogarty, III on 9/10/2007.

(1) Regarding claim 26:

**Insert the paragraph ---regrouping the groups that are less than a second specified threshold distance apart; and applying a group decision rule to the regrouped groups;--- after the paragraph "adjusts the DLLs for the remaining signals so that the signals are greater than the specified threshold apart;".**

(2) Regarding claim 30:

**Insert the paragraph ---regrouping the groups that are less than a second specified threshold distance apart; and applying a group decision rule to the regrouped groups;--- after the paragraph "adjusts the DLLs for the remaining signals so that the signals are greater than the specified threshold apart;".**

(3) Regarding claim 8:

Line 1, replace "The method of claim 7" with **---The method of claim 1---**.

(4) Regarding claim 9:

Line 1, replace "The method of claim 7" with ---**The method of claim 1**---

***Allowable Subject Matter***

2. Claims 1-6 and 8-34 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The present inventions described the method for code tracking in multipath with a plurality of paths using delay lock loops comprising assigning a DLL to each path in the multipath; adjusting each DLL to maximize a strength of sample in each path; placing paths having samples less than a first specified distance threshold apart into groups; adjusting the DLL assigned to each path in the groups so that samples from paths in the group are greater than the first specified distance threshold apart, wherein adjusting the DLL comprises fixing a location for a path having samples with a largest magnitude in the group and adjusting the DLLs of other paths so that the samples of the other paths are greater than the first specified distance threshold apart; regrouping the groups that are less than a second specified threshold distance apart; and applying a group decision rule to the regrouped groups. The closest prior art, Smolyar et al. discloses a similar method but fail to discloses the step of regrouping the groups that are less than a second specified threshold distance apart; and applying a group decision rule to the regrouped groups. This distinct limitation has been added to independent claims 1, 26, and 30 thus rendering them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
